Information about Copyrighted Content

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

**NOTICE
WARNING CONCERNING COPYRIGHT RESTRICTIONS**

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR PROCESSING NOTES FOR #4652
Midlife in the United States (MIDUS 2), 2004-2006
DS1: M2_P1_Aggregate Data

1. **Variable Link:** The variable **M2ID** is the individual-level linking variable for the MIDUS datasets. The variable **M2FAMNUM** is the household-level linking variable for the MIDUS datasets.
2. **Stata Limitations:** Due to Stata limitations, the variable **B1PSOC** do not contain value labels for non-integer values within the Stata files.
3. **Weight Variables:** This collection includes the weight variables that should be used in any analysis. These sampling and post-stratification weights were created for the national Random-Digit Dialing (RDD) sample. For additional information, please refer to the weighting documentation provided for the data collection.
4. **Variable Differences:** Some variables that are included in the data set released by ICPSR are not referenced in the P.I. documentation; no further information was provided.
5. **Constructed and Derived Variables:** Some scales and variables in the collection were constructed to measure psychometric and psychosocial factors. Users are encouraged to refer to the constructed variables documentation included with this data collection for additional information.
6. **Additional Information:** For additional information on the Midlife in the United States survey series, please visit the [MIDUS](#) website.

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

B1SA30A: Vigorous job activity frequency (summer)

The next section asks about various "levels" of physical activity (vigorous, moderate, light) - while at your job, while at home, and during your leisure/free time. Please answer each question thinking Pre-question: first about summertime, and then about wintertime. (If the question does not apply to you, for example, because you do not have a paid job or are retired, please circle 6 for "Never.") How often do you engage in vigorous physical activity that causes your heart to beat so rapidly that you can feel it in your chest and you perform the activity long enough to work up a good sweat and are breathing heavily? (Examples: competitive

sports like running, vigorous swimming, or high intensity aerobics; digging in the garden, or lifting heavy objects.) WHILE AT YOUR PAID JOB DURING THE SUMMER?

B1SA35: Waist around navel (inches)

The next questions are about body measurements. We have enclosed a tape measure to help you. It is yours to keep. The information will be more accurate if you follow these suggestions: Make Pre-question: measurements while standing. Avoid measuring over clothing (even thin clothing can add a 1/4 inch). Try to record answers to the nearest quarter (1/4) inch. What is your waist size--that is, how many inches around is your waist? Please measure at the level of your navel.

B1SL12: Who does more household chores

Running a household involves a lot of chores (like cooking, shopping, laundry, cleaning, yard work, repairs, and paying bills), and couples vary in who does these things. Overall, do you do more of such chores, does your spouse or partner do more of them, or do you split them equally? If you have children, do not count childrearing tasks such as bathing them, taking them places, or helping them with their homework, but do include chores like doing their laundry, washing their dishes, or cooking for them.
